

Ryan Stopczynski

Tampa, FL 33626 | (248) 568-8076 | stopczynski@usf.edu | [LinkedIn](#) | [GitHub](#)

Education:

University of South Florida, Tampa, FL

Master of Science, Artificial Intelligence and Business Analytics

Expected Graduation: May 2026

University of South Florida, Tampa, FL

Bachelor of Science, Business Analytics and Information Systems (GPA: 4.0/4.0)

May 2024

Technical Skills:

Programming: Python, R, SQL, C#, JavaScript, HTML, CSS

Data Science & ML: Pandas, NumPy, Scikit-learn, TensorFlow, NLTK (NLP)

Frameworks: ASP.NET Core MVC, Entity Framework Core

Web Development: RESTful APIs, Razor, jQuery

Databases: SQL Server, PostgreSQL, Oracle

Cloud: Microsoft Azure, AWS

ML Algorithms: Logistic Regression, Decision Trees, Random Forest, SVM, KNN, Naïve Bayes, Neural Networks

Data Visualization: Tableau, Power BI, Matplotlib, Seaborn, Interactive Dashboards

Tools: Git, Visual Studio, Jupyter Notebook, Google Colab, RStudio, Spyder, MS Excel (Advanced Analytics)

Certifications: [USF Muma Citizen Data Science](#), [Data Analysis for Sustainability](#)

Project Experience:

August 2024 – May 2025

U.S. Nuclear Outage Tracking Web Application

- Developed and deployed a full-stack ASP.NET Core MVC app with C# and Azure to track U.S. nuclear outages using real-time data from a RESTful EIA API.
- Implemented CRUD operations and interactive visualizations (jQuery, Razor, Bootstrap) to display outage trends by facility and generator.

Fake News Detection Using Machine Learning

- Built a Python-based classification tool to detect fake news using NLTK and Scikit-learn for preprocessing (TF-IDF, tokenization) and model evaluation.
- Tested SVM, Logistic Regression, and Naïve Bayes algorithms, with SVM achieving the highest accuracy; designed for use in journalism and social media moderation.

Healthcare Data Warehouse

- Designed and implemented a healthcare data warehouse in Oracle SQL Developer using OLAP/OLTP schemas, ERDs, and a Julian date dimension to support longitudinal analysis.
- Transformed Mockaroo-generated patient data and built dashboards to analyze billing, procedures, and revenue trends for improved hospital decision-making.

Relevant Experience:

Graduate Teaching Assistant, University of South Florida, Tampa, FL

August 2024 – May 2025

- Provided instructional support for undergraduate students through holding in-person and remote office hours.
- Graded projects and provided constructive feedback to enhance student learning.

Intel Sustainability Project, The Global Tech Experience, Tampa, FL

July 2023 - August 2023

- Analyzed energy availability and consumption patterns to support the selection of the optimal location for a new data center.
- Created visualizations and an interactive Tableau Dashboard to effectively communicate data findings to non-technical stakeholders.

Excel & Tableau Trainee, The Global Tech Experience, Tampa, FL

May 2023 -July 2023

- Conducted data analysis using Excel, including functions, pivot tables, and visualizations.
- Created visualizations, interactive dashboards, and reports using Tableau Software
- Analyzed A/B test results and produced data-driven business recommendations.
- Aggregated unstructured data from multiple sources to streamline data analysis.
- Created data visualizations for a variety of industries and scenarios leveraging best practices.
