

# Ryan Stopczynski

Tampa, FL 33626 | (248) 568-8076 | [stopczynski@usf.edu](mailto:stopczynski@usf.edu) | [LinkedIn](#) | [GitHub](#)

## Education:

University of South Florida, Tampa, FL

**Master of Science, Artificial Intelligence and Business Analytics**

Expected Graduation: May 2026

University of South Florida, Tampa, FL

**Bachelor of Science, Business Analytics and Information Systems (GPA: 4.0/4.0)**

May 2024

## Technical Skills:

**Programming:** Python, R, SQL, C#, JavaScript, HTML, CSS

**Data Science & ML:** Pandas, NumPy, Scikit-learn, TensorFlow, NLTK (NLP)

**Frameworks:** ASP.NET Core MVC, Entity Framework Core

**Web Development:** RESTful APIs, Razor, jQuery

**Databases:** SQL Server, PostgreSQL, Oracle

**Cloud:** Microsoft Azure, AWS

**ML Algorithms:** Logistic Regression, Decision Trees, Random Forest, SVM, KNN, Naïve Bayes, Neural Networks

**Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Interactive Dashboards

**Quality Assurance:** Selenium, BrowserStack

**Tools:** Git, Visual Studio, Jupyter Notebook, Google Colab, RStudio, Spyder, MS Excel (Advanced Analytics)

**Certifications:** [USF Muma Citizen Data Science](#), [Data Analysis for Sustainability](#)

## Project Experience:

### Automated Web Application Quality Assurance System

- Designed and executed manual and automated test cases, developing Selenium and BrowserStack UI tests to validate functionality, usability, and reliability across multiple browsers and environments.
- Logged, tracked, and automated regression testing workflows to identify defects, improve test coverage, and reduce manual QA effort through structured test reporting.

### U.S. Nuclear Outage Tracking Web Application

- Developed and deployed a full-stack ASP.NET Core MVC app with C# and Azure to track U.S. nuclear outages using real-time data from a RESTful EIA API.
- Implemented CRUD operations and interactive visualizations (jQuery, Razor, Bootstrap) to display outage trends by facility and generator.

### Fake News Detection Using Machine Learning

- Built a Python-based classification tool to detect fake news using NLTK and Scikit-learn for preprocessing (TF-IDF, tokenization) and model evaluation.
- Tested SVM, Logistic Regression, and Naïve Bayes algorithms, with SVM achieving the highest accuracy; designed for use in journalism and social media moderation.

### Healthcare Data Warehouse

- Designed and implemented a healthcare data warehouse in Oracle SQL Developer using OLAP/OLTP schemas, ERDs, and a Julian date dimension to support longitudinal analysis.
- Transformed Mockaroo-generated patient data and built dashboards to analyze billing, procedures, and revenue trends for improved hospital decision-making.

## Relevant Experience:

### Data Analyst Intern, Expert Inspectors Inc., Daytona Beach, FL

May 2025 – December 2025

- Analyzed residential inspection data for 4-Point and Wind Mitigation reports using SQL and Excel to identify trends related to roof age, construction type, and system condition.
- Supported operational reporting used by management to evaluate inspection efficiency and reduce report rework.
- Built and maintained operational dashboards in Tableau to track inspection volume, turnaround, and report rework rates.

### Graduate Teaching Assistant, University of South Florida, Tampa, FL

August 2024 – May 2025

- Provided instructional support for undergraduate students in the Business and Economic Statistics I course through in-person and remote office hours.
- Graded projects and provided constructive feedback to enhance student learning.
- Coordinated with graduate TAs to support scheduling and workload planning for a 400+ student course.

### Data Analyst (Intel-Sponsored Project), The Global Tech Experience, Tampa, FL

May 2023 - August 2023

- Performed exploratory data analysis and A/B testing in Excel to evaluate business performance metrics.
- Analyzed energy availability and consumption data to support data center site selection decisions.
- Built Tableau dashboards to communicate insights to stakeholders.
